

Power Supply Chain Digital Transformation through world-class Data expertise

\$5,000

PER YEAR

How ECCMA membership equips consulting firms to deliver faster, more credible, AI-ready Digital Transformation for their clients

— THE CHALLENGE FOR CONSULTING FIRMS

Client data quality is the hidden factor that stalls projects and delays fees.

Building data quality capability in-house is costly, complex, and not consulting core business.

ECCMA gives you a world-class expert backend — resolve data quality, interoperability and supply chain transformation problems faster, at lower cost, with internationally recognized standards authority.

— WHAT YOUR FIRM GAINS AS AN ECCMA MEMBER

Market Differentiation

Embed internationally standardized data quality services that competitors cannot easily replicate. Backed by ECCMA's ISO standards authority.

Accelerated Revenue

Data quality stops blocking sales and delaying implementation fees. Faster project delivery means faster recognition of revenue.

Extended Scope

Re-sell or refer ECCMA data resources and applications directly to clients. Open new revenue lines alongside your advisory work.

Credentialed Authority

Put internationally recognized standards expertise in front of clients. ECCMA is ISO Category A Liaison and Project Leader for ISO 8000, ISO 22745, and ISO 25500.

Build your reputation for value

Lead with value creation using ECCMA data management applications, master data resources, tools, and expert services - all standards-based and accessible through membership

2 of 3

— VALUE DELIVERED TO CLIENTS

Faster Project Delivery

Data remediation no longer derails timelines or inflates implementation cost

AI-Ready Data Foundation

Verified master data that AI agents can act on with confidence

Supply Chain Interoperability

Portable, standardized data that retains meaning across all systems and trading partners

Verified Supplier Onboarding

Tools to verify supplier identity - accelerates procurement cycles and reduces fraud risk

— MASTER DATA RESOURCES — ACCESSIBLE VIA API

ITEM MASTER DATA

6M+

Standardized Item Records

ISO 8000-114 structured technical specifications. Structure before cataloging - accelerates delivery and reduces errors.

ISO 8000, ISO 22745

SUPPLIER IDENTITY

300M+

Verified Company Identity Records

ISO 25500 IBID-verified supplier identity. Tools to verify supplier identity; ECCMA verifies members' own IBID on joining.

ISO 25500, ISO 8000-116

METADATA & REFERENCE DATA

2M+

Technical Dictionary Terms

ISO 22745 standardized terminology and concept identifiers. Removes ambiguity across systems and languages.

ISO 22745

CATALOGING TEMPLATES

20K+

Item Description Templates

ISO 22745-30 structured templates with description rules for consistent, complete item characteristic data.

ISO 8000, ISO 22745

SPEND CLASSIFICATION

13,000

Spend Analysis Classification Codes

Four-level hierarchy mapped to UNSPSC, CPV, & harmonized tariff codes. Supports spend analysis and regulatory reporting.

ISO 8000 · UNSPSC / CPV / HTC (HS)

LOCATION & IDENTIFIER DATA

Automate - Verify

Location & Product Identifiers

ISO 8000-118 Natural Location Identifiers (eNLI) and ISO 8000-115 SmartPrefix™ for globally unique, traceable identifiers.

ISO 8000-115, ISO 8000-118, ISO 25500

— EXPERT DATA SERVICES — AVAILABLE TO DEPLOY FOR CLIENTS

Included in membership

- **Data quality initial assessment** — ISO 8000 master data quality review with findings report and roadmap
- **Master Data Validator (eMDV)** — ISO 8000-compliant cloud application; MRO and Supplier Master Data modules
- **Supplier Master Data Quality Analysis and identity verification** — offer data analysis and verify supplier IBID and SmartPrefix™ in supplier master (ISO 25500)
- **Metadata management** — map data dictionary to eOTD concept identifiers (ISO 22745)
- **Smart Catalog Builder (eSCB)** — structured, standards-based item cataloging application

Fee-based services (additional cost)

- **Master data cleansing** — structured remediation using ISO 22745 dictionary and ISO 8000 rules
- **Item cataloging as a service** — new item creation integrated into client purchase order workflows
- **Spend analysis classification** — computer-assisted classification using ECCMA domain experts and ML/AI
- **Supplier / customer master remediation and research** — extended identity verification and master data enrichment
- **Staff training & certification (discounted for members)** — ISO 8000, ISO 22745, ISO 25500 courses at Entry, Foundation and Professional levels

Ready to differentiate your practice? ECCMA Data and Software Services are available to and through ECCMA members only. Full membership is \$5,000 per year.
